LOT 2537HA - Industrial Automation PLC I/O Rack Assembly w/ PEAK-System Ethernet Gateway DR — Untested, Appears C

Condition New

Lot Size 1

Retail Value 1,500

Returnable Yellow - At Pick Up

Box Status Out of Box

Shippable No

Description

Description:

This item appears to be a **modular industrial control or PLC I/O rack system**, likely used for **automation, robotics, or process control**. Based on visible components, it includes multiple **I/O modules**, organized wiring harnesses, and a **PEAK-System PCAN Ethernet Gateway DR (Model IPEH-004010)**. The wiring and connectors suggest it was part of a **CANopen, DeviceNet, or similar fieldbus-controlled network**.

Please note — we have not powered on or tested this equipment. Identification is based solely on visual inspection and general familiarity with industrial control systems. The specific module series, manufacturer, and configuration are **not confirmed**.

Visible details include:

- PEAK-System Ethernet Gateway DR, Serial No. 30864
- Multiple gray modular I/O units with removable terminal blocks
- Professionally bundled wiring with red, black, yellow, and green leads
- Two green pluggable terminal blocks (numbered)
- Mounted on a metal DIN rail base with terminal end blocks
- Appears to have been removed from an operational control cabinet

Approximate Use Case (Best Guess):

Industrial automation, machine control, or testing environment requiring modular I/O and Ethernet-based communication.

Included:

- Full rack assembly with mounted modules and power supply
- All attached wiring and connectors (as shown in photos)
- PEAK-System Ethernet Gateway DR module

Not Included:

- Documentation, software, or additional cables
- Any guarantee of compatibility or function

Quantity: 1
